

ABOUT ME

Full Stack Web Developer with a passion for technology and improving users experience on the web. Holds a Bachelor's Degree in Communications from UNC - Chapel Hill and a certificate in full stack Web Development from the UNC Coding Boot Camp. Skilled in HTML/CSS, Javascript, Node, MySQL and adept at collaborating with peers to create interesting and dynamic projects. Brings a unique perspective to the tech industry as a great team player with creative and innovative ideas.

PROJECTS

Beerstrology

<https://lbdcode.github.io/Project1/>

Contributed: Research, Javascript, CSS

A fun app that connects two exciting interests - beer and astrology!

- Takes UI to match user with their astrological sign and then provides them with their horoscope for the day as well as suggested beer pairings for their sign.
- Uses Firebase to store user data so that they can log in and check their horoscope and beer suggestions. Also allows them to have a saved profile that they can share with friends.

HTML, CSS, Javascript, jQuery, Zurb Foundation, Firebase, Photoshop/Illustrator

PROOF - A Whiskey App

<https://proof-whiskey.herokuapp.com/>

Contributed: HTML, CSS, Javascript, Research

- Provides user with extensive whiskey database
- User can save cocktail recipes as well as add recipes of their own
- Utilizes Google Place API so that user can look up and save favorite bars

EXPERIENCE

Buckthal Orthodontics, Raleigh, NC June 2017-18

Freelance Marketing Consultant

- Assist the office manager in curating content for the company's various social media sites, including Instagram and Facebook.
- Revitalized the company's online presence, helping them to connect with both current and prospective patients.

Beeta Honey

April 2015-Sept 2015

Social Media Marketing Intern

- Communicated and collaborated with my superior and founder of the company on a regular basis to create new and innovative marketing solutions for the company's various social media sites.
- Designed social media campaigns to attract new followers and potential customers.
